

Vali Ahmad Rahmani

Academic Curriculum Vitae

Tehran, Iran | valirahmani.ac@gmail.com
github.com/valiahmad | valiahmad.github.io

Research interests

Natural language processing, sentiment analysis, and the evaluation of reliable conversational applications. Interested in combining an academic NLP foundation with practical software development in graduate computer science study.

Education

BSc in Computer Engineering

Islamic Azad University, Tehran, Iran | February 2019 – July 2023

GPA reported in prior CV: 3.84/4.00 overall; 3.94/4.00 over the final two years. Verify the grading scale against the transcript before submission.

Final project: Product Feature Extraction and Sentiment Analysis

Honors reported in prior CV: ranked sixth among the 2019 entering cohort; straight-A results for six semesters.

Selected coursework: Natural Language Processing, Artificial Intelligence, Computational Intelligence, Computer Vision, Data Structures, Algorithm Design, Engineering Mathematics, and Software Engineering.

Research and academic projects

Product Feature Extraction and Sentiment Analysis | 2023

BSc final project investigating the extraction of product features and sentiment from textual reviews. Dataset, methodology, evaluation results, and final report should be linked once recovered from the original project materials.

Sentiment Analysis on Amazon Reviews Using Python | 2022

Academic Python project exploring sentiment analysis of product reviews.

Earlier manuscript in preparation

Improving Naïve Bayes Algorithm Using Lexicon in Sentiment Analysis. Listed as in preparation in the prior CV. Current manuscript status is unverified; this entry does not represent a published or accepted paper.

Academic programming projects

- Library Management System of IAUTNB in Python (2023).
- Eight-Queens using hill climbing in Python (2022).
- Sudoku solution validator using multithreading in C++ (2021).

Teaching and mentoring

Teaching Assistant in Advanced Programming

Electrical and Computer Engineering Department, Islamic Azad University, Tehran
October 2021 – January 2022; October 2022 – June 2023

Supported programming coursework and student technical work.

Mentor in Natural Language Processing

Electrical and Computer Engineering Department, Islamic Azad University, Tehran
February – June 2022; October 2022 – June 2023

Supported students with NLP coursework and related technical concepts.

Professional experience

IT Manager | Afghanistan Embassy, Tehran

Current position | Start date and promotion dates to be confirmed

- Develop Python and Django tools for monitoring, attendance, and operational reporting.
- Deploy and troubleshoot web applications and databases while administering organizational IT systems.
- Develop a Telegram assistant with Django and Ollama; current work is a prototype rather than completed research.

Technical background

Python, C++, JavaScript, SQL, Django, PostgreSQL, Git, and software deployment. Academic exposure to MATLAB, NLP, machine learning, and sentiment analysis. Current application experience with local language models through Ollama.

Academic service

Membership in the Artificial Intelligence Association of IAU Tehran North Branch was listed in the prior CV. Helped students engage with online coursework during COVID-19 through social-media study groups.

Languages and application records

Persian: native. Prior CV records TOEFL 79 (Reading 22, Listening 18, Speaking 19, Writing 20); test date and current reporting eligibility require verification. Referee contacts are retained in the original CV and should be provided with their consent when requested.
